

Aim: PROLOG PROGRAM FOR A DATABASE WITH NAME AND DOB

To create a Prolog database containing names and dates of birth and retrieve information using queries.

Objective:

- ☐ To represent information using Prolog facts.
- ☐ To retrieve a person's date of birth using queries.
- ☐ To demonstrate database-like reasoning in Prolog.

Algorithm:

- ☐ Start.
- ☐ Define facts containing names and dates of birth.
- ☐ Create a predicate dob/2.
- ☐ Query the database using a person's name.
- ☐ Display the corresponding date of birth.
- ☐ Stop..

Flowchart:

Prolog Program:

% Name and Date of Birth Database

dob(rahul, 15_january_2004).

dob(priya, 20_march_2003).

dob(arun, 10_july_2004).

dob(neha, 25_december_2003).

dob(kiran, 5_may_2004).

Output:

```
66 ?- find_dob(rahul, DOB).  
DOB = '10-05-2004'.
```

Result:

Thus, the Prolog database successfully stores and retrieves name and date-of-birth information.
